

PIONEERS IN ORGANIC FAIRTRADE FOOD

AlterNativa3 is a cooperative which manufactures organic Fairtrade proucts since 1992.

Our goal is to offer responsible, sustainable and high-quality alternatives to your everyday products, especially coffee, cocoa and cane sugar.

We know that fair trade is an effective tool to eradicate the inequalities and poverty generated by conventional international trade.

Therefore, in addition to manufacturing our products, we carry out different workshops in order to raise awareness and also lead social projects in the Global South countries to support the processing cooperatives in its growth.

Did you know that many of the products we consume hide several forms of child exploitation?

The producing families from who we get our coffee, cocoa and sugar live in Africa, Asia, Central America and South America.

In most of these countries, Human Rights are not respected, women have no access to landowning and child labor is systematic.

Lots of the products we consume daily aggravate this situation. AlterNativa3 is the solution: we offer ethical options to your everyday products.

Thanks to Fair Trade, people from the producing cooperatives improve their family and community life conditions.

Over 400 delicious and very healthy products. All of them are organic and elaborated with no chemical products nor treatments which are harmful for health

and the environment.

Check the labels. You will see that the ingredients list is very short: no additives, all natural.

You take care of your health, the people and the planet with sustainable and Fairtrade options for your everyday products.

AlterNativa3 is a small family cooperative, but thanks to you, we do big things.

AlterNativa3 believes in networking with other organizations which promote Fair Trade, environmental sustainability and social economy as the best way to achieve its goal: creating a more equitable society based on the respect for human rights and the environment.
